

Sprint 3 Report

Bathroom Locator

Tuesday November 18, 2025

Burnup Chart:

Some tasks are being moved to the next sprint

Completed Tasks:

Infrastructure Tasks

1. Update UI to match Figma designs
2. Fix the frontend linter, and all the linter issues that have accumulated

User Story 5

1. Figma design for verification/like system

2. POST endpoint to add a “like” to a bathroom
3. DELETE endpoint to remove a “like” from a bathroom
4. GET endpoint to get all of a given user’s liked bathrooms

User Story 6

1. Update UI of the sign up page to match the Figma Design

User Story 8

1. Figma design for the bathroom amenities
2. Update the backend bathroom object to include amenities

User Story 9

1. Figma design for adding a new bathroom to the map
2. POST endpoint to add a bathroom to the database
3. Research how to automatically pull new data, for real time updates
4. Implement long polling, so the map automatically updates for everyone when there’s a change to the database

User Story 10

1. Figma design to edit details of an existing bathroom
2. PUT endpoint to update details of an existing bathroom

User Story 13

1. Update UI of the login page to match the Figma Design

Work Completion Rate:

Tasks complete: 15

Number of days in sprint: 14 days

Average tasks/day: ~1.07

Incompleted Tasks

Infrastructure Tasks

1. Marker for User's current location on the map – In progress

User Story 5

1. Frontend to verify a bathroom – Blocked

User Story 8

1. Add amenities to the bathroom details UI – Blocked
2. Add amenities to filter dropdown, and implement filtering logic – In progress

User Story 9

1. Form Description for adding a new bathroom – In progress
2. Ensure user is logged in to add bathrooms – In progress

User Story 10

1. Add UI for edit bathroom feature (edit button, edit form, connect to endpoint, make sure user is logged in) – Blocked

User Story 12

1. Implement search bar in frontend so users can view a specific location on the map – In review

Sprint 3 Retro

Things to start:

- Start tasks earlier and let others know if their task is blocking yours
- Ensure that a feature is fully implemented and tested for sending out a PR

Things to stop:

- Adding too many tasks to a sprint!
- Missing meetings, or joining late without prior notice
- Starting and completing tasks late; not giving reviewers a lot of time to leave comments + yourself to implement those changes

Things to continue:

- Keeping our Scrum board up to date
- Alerting people on discord when requesting their approval for a PR
- Following up with people about PRs for review

Things we observed:

- We had multiple blocking tasks that prevented us from starting on other related features.
- We should reassign tasks earlier when they are blocking others for a long time.
